

Vineeth Kumar Reddy Pasala

B.Tech. – CSE – Narasaraopeta Engineering College
Email: vineethreddy017@gmail.com | Ph: +91-7207854386
GitHub | **LinkedIn** | **ByteXL** | **LeetCode**

PROFESSIONAL SUMMARY

Aspiring Software Engineer skilled in Java, Python, C++, SQL, and Full Stack Development. Experienced in building responsive web applications and AI-powered solutions through projects and internship experience. Strong in problem-solving, OOP, and software development, with a passion for building practical, scalable applications.

KEY SKILLS

Java, Python, C++, SQL, HTML5, CSS3, JavaScript, React.js, MySQL, Git, GitHub, Object-Oriented Programming (OOP)

EDUCATION

NARASARAOPETA ENGINEERING COLLEGE — **2024 – 2027**
B.Tech. – Computer Science and Engineering | CGPA: 8.51 / 10

SRI VENKATESWARA COLLEGE OF ENGINEERING & TECHNOLOGY — **2024**
Diploma – Computer Science and Engineering | Percentage: 86.18%

NALANDA HIGH SCHOOL, PULIVENDULA — **2021**
SSC | CGPA: 10.0 / 10

INTERNSHIPS

DATAVALLEY INDIA PVT. LTD. | **IT / Computers – Artificial Intelligence** — **04 May, 2026 - 27 Jun, 2026**
AI Automation & Agent Engineering Intern
Key Skills: Python, Artificial Intelligence, Machine Learning, AI Agents, Workflow Automation, SDLC
Completed a 2-month industry-oriented internship focused on Artificial Intelligence Automation, AI Agents, and intelligent workflow development. Worked on AI automation concepts, intelligent workflows, and Python-based solutions. Developed and tested 3+ AI-driven automation use cases. Gained hands-on exposure to Artificial Intelligence, Machine Learning, Agent Engineering, Workflow Automation, and SDLC methodologies. Collaborated with mentors and team members on 5+ technical assignments, improving debugging, analytical thinking, and problem-solving capabilities. Worked on AI-driven software solutions involving requirement analysis, implementation, testing, debugging, and deployment.

PROJECTS

BLOODDROP – BLOOD DONATION MANAGEMENT SYSTEM — **01 Oct, 2025 - 10 Oct, 2025**
Key Skills: HTML5, CSS3, JavaScript, SQL, Database Management
Project Link: https://blooddrop360.vercel.app/
Developed a responsive web-based Blood Donation Management System to connect donors and recipients during emergency blood requirements. Designed and implemented 5+ core modules including donor registration, donor search, blood request management, and user information management, backed by a relational SQL database that efficiently manages 500+ donor records. Implemented blood group and location-based search functionality, reducing donor identification time by 40%. Applied responsive web design principles for desktop, tablet, and mobile platforms, following SDLC practices including requirement analysis, design, development, testing, and deployment.

WOLVGUARD – DIGITAL RISK PROTECTION PLATFORM | Team Size: 5 **24-Hour Hackathon Project**

Key Skills: React.js, JavaScript, Python, HTML5, CSS3, YouTube Data API v3, Google Gemini API, Supabase, Computer Vision, Git, Vercel

Project Link: https://wolvguard.vercel.app

Developed WOLVGUARD, a proactive brand protection platform designed to identify, assess, and detect unauthorized brand impersonation across social and digital channels. Implemented brand registration with official identity details, website, description, reference logo, and verified social media assets, and integrated YouTube Data API v3 to discover and monitor potentially impersonating channels using real-time channel information. Developed a transparent 4-signal risk scoring engine using name similarity (35%), visual logo similarity (30%), description matching (15%), and publisher difference (20%), with dynamic threat severity classification into Critical, High, Medium, and Low categories. Integrated a Google Gemini-powered AI Threat Assistant to explain risk assessments, identify suspicious patterns, and suggest brand protection measures, and implemented privacy-focused client-side logo hashing using HTML5 Canvas and visual similarity analysis using image processing techniques.

ACHIEVEMENTS

- Participated in HacXLerate 2026, a National-Level Hackathon, organized by ByteXL.

CERTIFICATIONS

INTRODUCTION TO INTERNET OF THINGS (NPTEL)

This course introduces the fundamentals of the Internet of Things, including sensors, connected devices, communication protocols, and data handling, along with real-world IoT applications.

JAVA PROGRAMMING CERTIFICATION – UNSTOP

This certification validates core Java programming skills, including object-oriented concepts, control structures, exception handling, and problem-solving using Java.

COMPLETION OF MONGODB COURSE – UNSTOP

This course covers the fundamentals of NoSQL databases and MongoDB, including document-based data modeling, CRUD operations, and querying.

APPLIED DATA ANALYSIS USING PYTHON – INTEL® UNNATI PROGRAM (EDGATE TECHNOLOGIES)

This program provides practical knowledge of data analysis using Python, including data cleaning, manipulation, and visualization, aimed at students and aspiring data professionals.

GENERATIVE AI BY GOOGLE CLOUD – 45-HOUR COURSE COMPLETION WITH 22 SKILL BADGES

This 45-hour course builds a foundation in Generative AI and large language models through hands-on Google Cloud labs, earning 22 skill badges.

PROFESSIONAL PROFILES

- https://github.com/vinni8871
- https://leetcode.com/u/pasalavineethreddy

HOBBIES & EXTRA-CURRICULAR ACHIEVEMENTS

- Participated in HacXLerate 2026, a National-Level Hackathon organized by ByteXL.
- Passionate about logical problem solving and sharpening analytical thinking through coding challenges.
- Enjoy online gaming and exploring new technologies to stay up to date with the latest trends.
